

Every Day—

Grape-Nuts food, with its wonderfully crisp, delicate flavor, is found on thousands of tables the world over.

The native sweetness of whole wheat, combined with the zest of malted barley, produces a food unparalleled for flavor and nourishment. Ready to eat, easy to digest, delicious—

Grape-Nuts with Cream

is an ideal daily ration for workers in all lines of human endeavor.

"There's a Reason"

SEE US FOR REPAIR WORK.

In coming before you through The Eagle, I wish to ask the people of Brazos and all adjoining counties to intrust their watch, jewelry and clock repairing, diamond mounting and engraving to me. I am guaranteeing you satisfaction. I could not do this unless I had the workmen to give you quick and first class service. I have added two first class workmen to the repair department, who are watch makers, engravers and opticians. I ask for your work, knowing that I can give you the proper service and satisfaction in every way. These men are graduates and post-graduates in optics and will take pleasure in testing any eyes, old or young. No doping the eye is necessary. A correct fitting of glasses as well as a correct fitting of frames to your nose or face at a very reasonable price.

J. M. CALDWELL,
Jeweler and Optician.

Attention School Children!

School will open September 18th and you will find me better prepared to serve you than ever before—Have installed a **HAMBERGER STAND** with a competent chef in charge. No use to worry about your lunch, I can serve you on short notice, and at a small cost. Will also carry Pies, Bottled Milk, Ice Cream Cones, Cold Soda and all **SCHOOL SUPPLIES** including Tablets, Pencils, Etc.

Everything Strictly CASH.

CLAUD R. LAWSON

JOHN M. CALDWELL,

Jeweler and Optician, Bryan, Texas

WHERE WE DIFFER FROM ANIMALS.

What makes us human is our religion. Everything else that distinguishes us from stones or trees and aligns us with animals and insects, these latter have as well as ourselves. It is very difficult to say which is the more human in heart and mind, a bright dog or a stupid, savage man, but it is as clear as daylight that the most savage and superstitious of men has something within him which the most brilliant of dogs can never have. It is the instinct that there is a God, or an invisible power around and above him.

Consequently, the experience of prayer is the deepest test of our manliness. The man who never prays is lower than the animals. He is often lower in his morals. He is always lower in his status. The man who prays carelessly and rarely has but a faint conception of what it means to be a man. Stress his opinion concerning the essence of his manhood.

and it will come out readily as something animal, such as mere muscle, or even courage, or fighting ability, or the like. If he realizes, on the contrary, that his religion is the only real test of his manhood, then he will show it by his reverence and earnestness in prayer, as well as by all other attempts to be Christ-like in life and character.—From St. Andrew's Cross.

POSTAGE STAMP RECORD.

Placed on Sale in 1874 and Increase in Sales Since Enormous.

Washington, Sept. 4.—Approximately 172,000,000 postage stamps have been issued by the United States since they were first placed on sale at New York July 1, 1847. Issuance passed the billion mark in 1882, the two billion mark in 1890, the three billion mark in 1896, the four billion mark in 1901, the five billion mark in 1902, the six, seven, eight, nine and ten billion marks in 1906, 1907, 1909, 1910 and 1911, respectively, and the eleven billion mark in 1914. Last year the exact number of ordinary postage stamps issued by the United States was 11,226,385,415. Stamped envelopes and wrappers issued numbered 1,793,764,296.

Australia avoids orphan asylums by sending parentless children to private families, which are paid for their care until they reach the age of 14 years.

Mounted on a window shade roller and bracket a new automobile awning protects the wind shield from rain and lessens the glare when the sun is shining.

PRESIDENT WILSON IS IN KENTUCKY

President Wilson Arrived This Morning at Hodgenville, Ky., Where He Will Speak.

(By Associated Press.)
Hodgenville, Ky., Sept. 4.—President Wilson arrived in this city this morning from the summer White House at Shadow Lawn, N. J. This is the first address the President has delivered in the interest of his campaign for the presidency since his speech of acceptance at the notification ceremonies last week.

PASTURING ALFALFA.

As pasturage for all kinds of live stock, except such as chew the cud, alfalfa is unexcelled. In many instances (as with red clover), but by no means always, the likelihood of its causing fatal bloat, especially when wet or of very rank growth, prevents its being a wholly trustworthy pasture plant for cattle or sheep. It should not be grazed upon at all until well established, and not then severely. Pasturing prior to a year after seeding is almost sure to be injurious, said F. D. Coburn in his address to the Ohio State Alfalfa Growers' Association. Many promising stands have been made unsatisfactory and unprofitable by pasturing too heavily or prematurely. If not stocked so heavily as to prevent one or two cuttings of hay during the growing season the fresh growths following these mowings will afford conditions well high perfect for the live stock.

In any scheme of general farming the most rational dealing with an alfalfa field is to plow it up when three, four or five years old and for a time use it in other crops, having in the meantime provided for an equal or larger sowing on another part of the farm. Theoretically this system is ideal for maintaining the farm's fertility and giving renewed vigor to its soil, but its defect is that farmers with well-set fields of alfalfa lack the courage to plow them up for any purpose and thus an important factor in a most excellent rotation is left unused.—Farm Life.

CHICAGO'S MUNICIPAL LAUNDRY

All Facilities Will Be Supplied Those Who Go There to Do Their Washing.

A municipal laundry is soon to be opened in Chicago. All laundry facilities, including a steam dryer, will be supplied to those who go there to do their washing, whether men or women.

"Clean clothes contribute to health," says Health Commissioner Robinson. "In some sections of the city poor people are forced to pay for their water in addition to their rent. The less they spend for water the more they will have for other necessities of life. Then they are forced to heat the water. That takes coal. Inspectors will tell you of many cases they have seen where the wife heats the water, then gives the baby a bath, then washes her clothes in the same water and finally uses it to scrub the kitchen floor. In this municipal laundry she will have all of the hot water she needs. Then in some quarters the wash is hung up to dry in the kitchen, when perhaps there is some one ill in the house. We will provide a steam dryer, where clothes can be dried thoroughly before they are worn."

When a widow takes a second husband for better or for worse she always knows that he will be worse.

It may be better to be happy than to be rich, but very few poor men ever derived any satisfaction from that belief.

A man would be given a patrol joy ride if he wore a suit made from striped awning; but a woman can get away with it.

Beauty in a woman often covers a lack of domestic virtues.

Gentlemen burglars think it is up to them to break into society.

A woman never appreciates her husband more than when he comes home and announces that his salary has been raised.

If we could only see ourselves as others see us—but we can't, so what's the use worrying?

Some language students maintain that Irish brogue is the ancient way of pronouncing English, preserved in its purity by residents of the Emerald Isle.

It is easy for a woman to keep a secret that isn't interesting.

CLASSIFIED COLUMN

FOR RENT.

FOR RENT—Two furnished rooms for light housekeeping. Modern conveniences. Three blocks from Main street. Phone 408.

FOR RENT—For third and fourth, 50 to 100 acres black prairie land. See W. J. Bullock.

HINTS FOR THE HOUSEHOLD.

Warm Water and Ammonia Will Cleanse Gold and Silver.

Gold and silver jewelry may be washed in a cupful of warm water with a teaspoonful of ammonia in it. Dry with soft cloth and polish with camellia leather.

Bronze articles should be immersed in boiling water, then rubbed with a piece of flannel dipped in yellow soap, then dried with a soft cloth and camellia.

School Lunches—It saves time in packing school lunches to do them always in the same place, with the lunch boxes, paraffin paper, sharp knife and paper napkins all close at hand.

When the vinegar cruet has become clouded, clean it by putting a teaspoonful of lye in it; let this remain for a few days, then wash out. It will be perfectly clean.

Fruit soups are made of sifted, stewed fruit thickened like cream soups with cornstarch, tapioca or arrow root and flavored to taste. They should be chilled before serving.

A compressed air locomotive has been installed on one large Cuban plantation to avoid danger from sparks.

Bricks that are made from furnace slag, according to their German inventors, increase in strength with age.

An electric flash lamp with a bulb in the shape of a hand is a novelty for night signaling by automobilists.

The railroads of the United States consumed 128,200,000 tons of coal last year, or 24 per cent of the total production.
